STAND UP TO THE CHALLENGE

DESIGNED FOR

5,000^{LB.}
LOADS

TOYOTA'S STAND-UP RIDER is at the top of its class in performance and comfort. With a lifting capacity ranging from 3,000-5,000 lbs., this power player is perfect for any warehouse application, whether you're docking or stocking products. Because it is designed for 5,000 lb. loads, it is more flexible, can handle more capacity at greater heights with added durability. Its compact design allows it to seamlessly navigate narrow aisles with ease, giving you the ability to store more products in your facility. From the AC System to the advanced ergonomics, Toyota's Stand-Up Rider is a multi-purpose solution ready to work as hard as you do.

ADVANTAGES OF THE STAND-UP RIDER

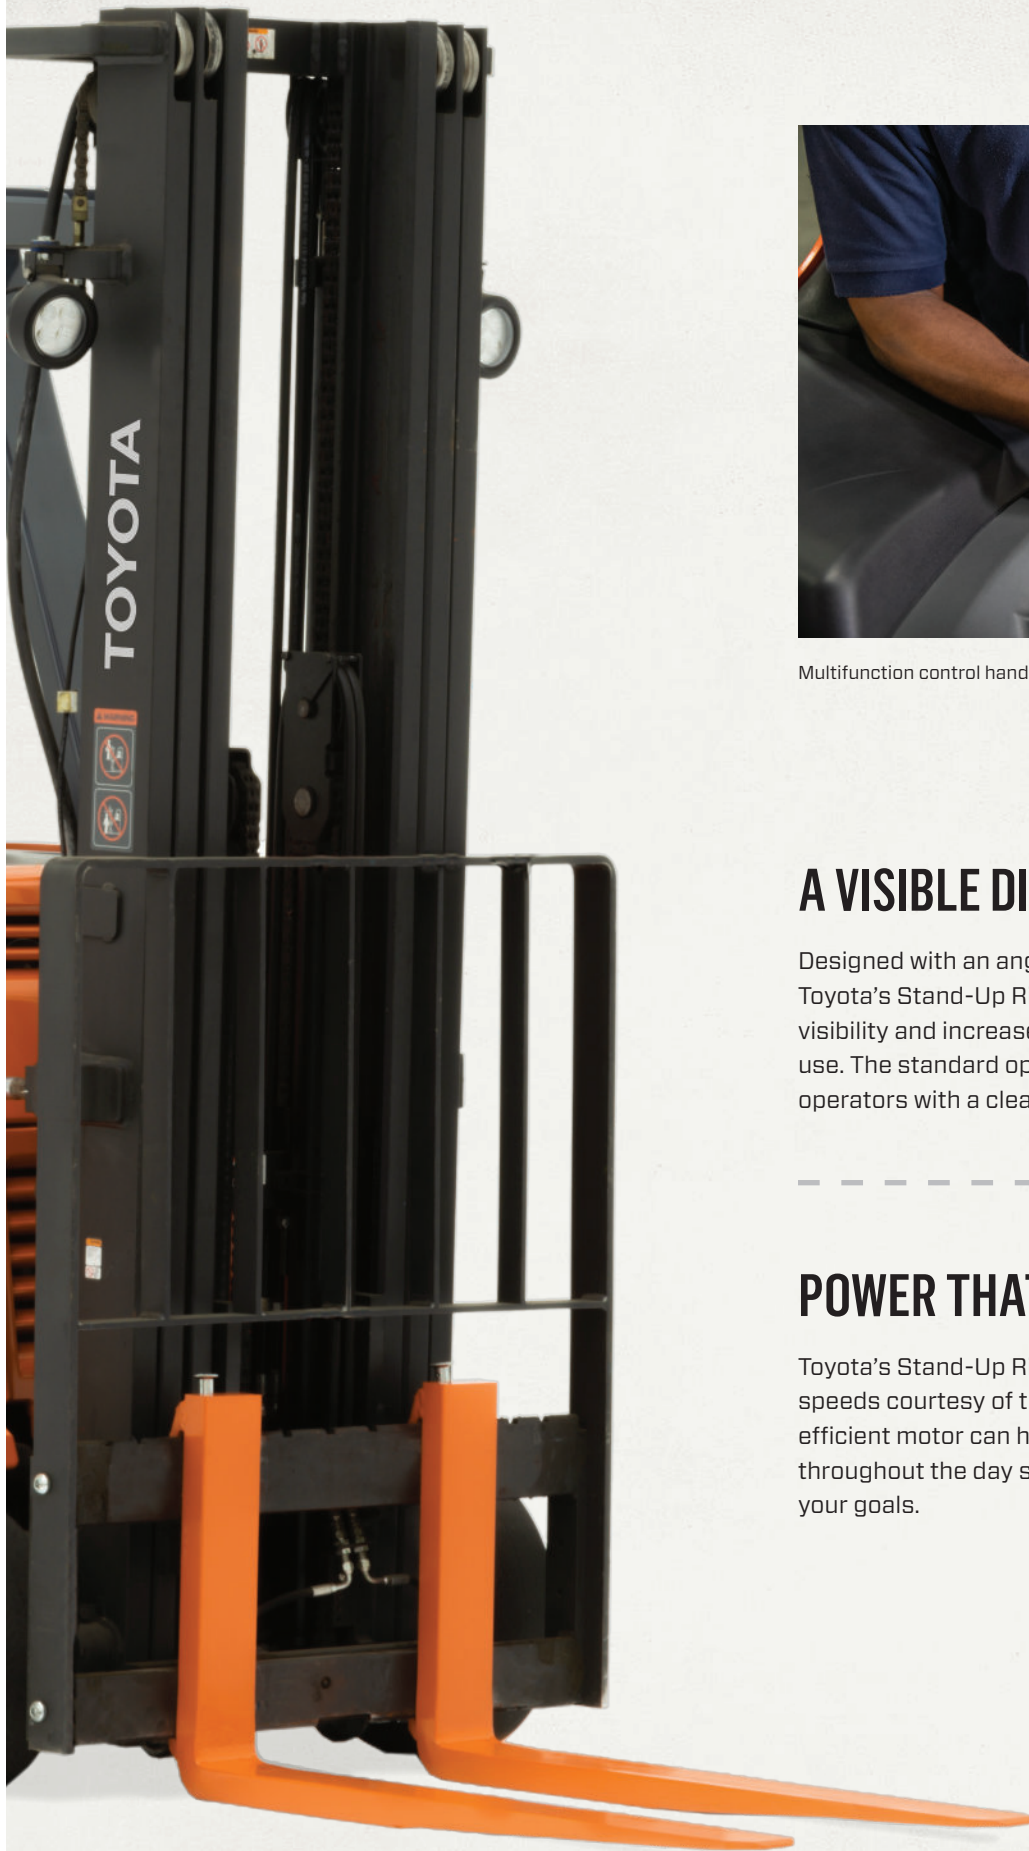

- ▶ **COMFORT RIDE SUSPENSION¹** enhances comfortability by reducing vibrations that may be transferred to the operator while the forklift is in use
- ▶ **AC DRIVE AND LIFT MOTORS²** provide superior performance and energy efficiency as well as reduced maintenance costs due to fewer moving parts
- ▶ **LOW 8" STEP HEIGHT** means easy entry and exit
- ▶ **OPEN VIEW MAST³** provides excellent forward visibility
- ▶ **MULTIFUNCTION CONTROL HANDLE** provides all travel and hydraulic functions for increased productivity and ergonomics
- ▶ **REGENERATIVE PLUGGING** returns energy to the battery, for increased efficiency and runtime

1 Comfort Ride Suspension is only standard on SR1-HP. It is optional on SR1-BE.

2 SR1-HP is AC drive and AC lift and SR1-BE is AC drive and DC lift.

3 Open View Mast is only available on SR1-HP models.

Multifunction control handle

A VISIBLE DIFFERENCE

Designed with an angled front cover and overhead guard, Toyota's Stand-Up Rider helps operators gain better visibility and increase efficiency while the forklift is in use. The standard open-view, 4-cylinder mast provides operators with a clear line of sight.

POWER THAT KEEPS YOU MOVING

Toyota's Stand-Up Rider delivers top travel and lift/lower speeds courtesy of the AC drive motor. This powerfully efficient motor can help you maintain high performance throughout the day so you can get more done to meet your goals.

COMFORT AND PRODUCTIVITY REIMAGINED

In addition to maneuvering quickly and efficiently through your warehouse, the Stand-Up Rider comes with a comfort ride suspension, which consists of a specially designed floor suspension system that aids in reducing the vibrational impact that can occur when operating a forklift by adapting to each operator's individual weight. This further magnifies the operator's comfortability to deliver a smooth, seamless ride shift after shift. In addition to increased comfort, this versatile lift comes equipped with full hydraulic controls so the operator can conveniently and easily maintain one hand on the steer tiller while allowing the other hand to control traveling, lifting, loading, and horn functions. This innovative design helps increase operator comfort and allows the operator to remain productive and focused on the task at hand.

A NAME YOU CAN **TRUST**

Our machines carry something no others can: The Toyota name. As one of the most recognized and respected global brands, the Toyota nameplate is synonymous with quality, durability, and value. It also provides a sense of confidence that few companies of any kind can match.

Every Toyota Forklift is engineered using the world-renowned Toyota Production System (TPS), which features Just-in-Time parts delivery and quality checks at every step of the manufacturing process.

It's all part of the Toyota philosophy of "kaizen," the dedication to continuous improvement. Instituted by our founder more than 80 years ago, it's a principle that still guides us today. As long as our forklifts carry the Toyota name, we'll continue striving to improve processes and quality.

AN INVESTMENT THAT PAYS YOU BACK

Toyota demands the best for its customers. It's a forklift with better components and meticulously planned integrated systems that work together to deliver intuitive, dependable performance day after day. Toyota Forklifts don't often require service. But when they do, it's fast and easy — by design. And legendary Toyota quality means more productivity over the lifecycle of your forklift, along with lower repair costs. Higher residual value is another bonus.

WORLD-CLASS MATERIAL HANDLING SOLUTIONS

PARTNER WITH TOYOTA, AND LET US HELP DEVELOP THE RIGHT SOLUTION FOR YOU.

With access to the world's industry-leading lineup of material handling products, Toyota dealers are uniquely positioned to help you solve your wide-ranging challenges. Built for every application, Toyota can provide the most complete set of solutions for material handling, automation, energy, advanced logistics, and warehouse optimization.

Toyota is here to help optimize your business for maximum efficiency. Utilizing Toyota Lean Management principles, Toyota dealers can provide insights and develop appropriate plans to tackle your specific operational needs. This unique approach to optimization and elimination of waste can provide you with significant competitive advantages and a sustainable lean culture for lasting process improvement.
